Aanpak

[¡Geef aan hoe jullie de opdracht hebben aangepakt en wie wat heeft gedaan, maximaal 1 A-4. Geef expliciet aandacht aan de volgorde van activiteiten¿]

1   Problem analysis

Jabberpoint is a simple slide show application that can read a slide show from a source, allows the user to navigate through the slides and save the *state* of the running slide show to the source again.

The main concept is the **slide show**. A slide show consists of the following parts:

- A **head**, which consists of a **title** and a possible **theme** (ask teacher)

- A list of **slides**. There must be at least one slide present in the slide show. Slides in a slide show have a predefined order

- A list of **threads** (ask teacher).

The application does not provide the possibility of editing the slides within the slide show
